

**Candida** normally exists in its yeast form in the digestive tract. Due to the effects of antibiotics, it will convert to its fungal form and spread throughout the body. The fungal form creates excessive toxicity, which will affect the way every organ, tissue, and cell functions. This can contribute to or create many problems in the body. To reverse this effect, you have to eliminate the Candida and restore the natural bacterial flora. If you've ever had an antibiotic, you've got Candida.

***Symptoms of Candida:***

Symptoms vary from person to person. Common symptoms will reflect the various body systems affected and include digestive problems (constipation, diarrhea, "leaky gut" syndrome, irritable bowel syndrome, colitis); hormonal imbalances (menstrual difficulties, infertility, vaginal yeast infections, sexual difficulties); urinary tract (prostatitis, enlarged prostate, urinary tract infections); psychological health (depression, "fogginess," anxiety, emotional control, lack of mental clarity, inability to concentrate); immune system (colds, infections, autoimmune diseases); musculoskeletal system (joint pain, swelling, arthritis, fibromyalgia); skin conditions (fungal infections, rashes, dermatitis, psoriasis, eczema)... etc. Any organ and/or tissue can be involved, so the possibilities are endless.

***Joint Builder - \$28 (120 Easy-Solve Tablets)***

A Glucosamine Sulfate Formulation for Support of Cartilage & Joint Function. Glucosamine Sulfate is a stable, clinically studied source of glucosamine, which is the fundamental building block required for the synthesis of connective tissue subunits glycosaminoglycans). Glucosamine is an essential building block of proteoglycans, hyaluronic acid (a component of joint lubrication) and glycolipids, and it is essential for the proper formation of tendons, ligaments, synovial fluid, bones, skin, nails, and blood vessels. Joint Builder Glucosamine is naturally water-soluble, and low in molecular weight, thereby offering rapid and high absorption (over 90%). MSM is a sulfur donor, which is essential for the formation of chondroitin sulfates. Vitamin C and manganese are required for synthesis of collagen and cartilage. People with osteoarthritis are often deficient in Vitamin D3. Suggested Usage: Take 2 to 4 tablets daily, or as directed by your qualified health consultant. Easy-Solve tablets dissolve within several minutes after ingestion.

***Q-Link Pendant - \$129 (Black or White)***

Q-Link products tune up your biofield through a resonant effect that harmonizes your energy and helps you to navigate smoothly through a stressful world. Sleek and chic, with a dual-tone design, this beveled-edge triangle has two distinct sides, each making a unique statement. It can be worn by both men and women as a signature piece, dressed up or down. Designed by internationally acclaimed designer Neville Brody and powered by our next-generation SRT 3, the result is leading-edge attitude and super-charged power.
