Breathing: Internal breath into brain (pineal gland) creating a feeling of breathing into the body-brain-heart. Use picture image as a flower breathing deep and long smelling the flower, which goes into the brain. The image is the key to the connection to the brain using the breath. Religions are very good at this using Jesus, Buddha, Mary etc., or using a picture of your loved one it in the brain.

Heart Theory: Taoist Master have always dreamed of having anatomy books using a model to work with the cells. An example is a Cancer Tumor, which has 2 Billion cells, but the body has over a Trillion cells, but

you never train the body to destroy them. You are too busy listening to church to destroy them with pray & chanting. That does not work, so you go to the doctors and they cut them away along with other vital body parts, but you never learn to direct the body to destroy them naturally. Heart & Thymus-activate them by laughing & smiling - sadness suppresses them-now we pay people to make us happy-to laugh-Comedian.
