

Music has also played an important part of my life because it help my mind work especially when I am writing or doing any activates so I always have it on in the background. All my close friends or roommates seems to be into music and stereo systems, which helped me get involved in music and all its components since my late teens. That is why I have over 325 albums on a digital format for any stereo system, which contains all my favorite music from classical to Taoist music to jazz, to classical rock of the sixties and seventies. There are also 18 lectures on audio covering the Tao, health and business that are informative and inspirational.

If any of you have the opportunity and time please read my music list of artists and lectures with commentary through the following 5 pages.

**Your Friend in the Tao,
The Professor (Wei Tzu)
Master of Nothingness
The Myth that takes the Mystery out of Mysticism**
